COLOR CODING OF MOBILITY CONTAINERS

This regulation standardizes the painting of all mobility containers and facilitates the identification of each container by the use of color and alpha/numeric codes. This standard system will enable personnel to sort property, check manifests, and onload and off load aircraft expeditiously.

1. Responsibility.

- a. The Director of Materiel is responsible for the overall implementation of this regulation.
- b. Each section supervisor is responsible for compliance with this regulation.

2. Procedures.

- a. All containers will be painted Dorsey Blue.
- b. The correct gross weight, net weight, dimensions, cube, and section manifest number will be marked on the top and ends of each container as shown in Attachment 1.
- c. All containers will be identified and color coded on two opposing corners as indicated in Attachment 1.
- d. Those sections assigned a two-color identification code will indicate both colors, using a one inch inner line as shown in Attachment 1.
- e. Color codes will not be used on containers which will remain at destination. These containers will be handled as a special group and

Supersedes WRSP-IV Reg 67-9, 14 Feb 69. (For summary of revised, deleted, or added material, see signature page.)
